

SUNBELT®
Logistics Group

Case Study # 2

The major grocery retailers in Canada source produce from across Canada as well as the United States.

As an example, Dedicated Full Truck Reefer shipments are transported from key growing regions throughout the United States to the retailers' Distribution Centers in Ontario and Quebec, which in turn are then distributed to the individual grocery store locations in these areas.

Timing is critical with these shipments, as is maintaining consistent temperatures in order to provide each grocery retailer with the freshest product for their customers.

Each of the major grocery retailers have specific processes to follow utilizing their proprietary systems.

For the past 15 years, Sunbelt Logistics has been a reliable and trusted service partner for these retailers for the movement of produce focusing on our core values of Integrity, Excellence and Responsibility to our customers and in turn, their customers.

We are not only a key component of their supply chain, but also contribute to their overall success on a daily basis.
